Summary

Full Stack Engineer working in TypeScript, Node.js, React and PostgreSQL, plus Python. Sole developer of a live e-commerce platform with 70,000+ products, zero duplicate charges and 3,130 automated tests that run in CI before every Docker deploy.

Experience

JWeb Nov 2025 – Nov 2026

Fullstack Developer Remote

- Owned JWeb web and mobile products as sole developer, turning management's feature requests into technical designs and taking them from data modelling to production
- Shipped PCByte (pcbyte.pt), a headless store with 70,000+ products on MedusaJS and PostgreSQL
- Built REST API modules for payments, Odoo ERP sync, search and AWS S3, with Zod validation, Google sign-in (OAuth2, OpenID Connect), CSRF protection and Redis rate limiting
- Built an idempotent PayPal and SIBS checkout (card, Multibanco, MB WAY) with zero duplicate charges
- Wrote 3,130 unit tests and end-to-end tests (Vitest, Jest, Playwright), run by GitHub Actions on every pull request, with automatic deploys to staging and production on Coolify after merge
- Built responsive interfaces and reusable components with React and Tailwind CSS, Lighthouse 92+
- Built a React Native app with JWT authentication and a Drizzle ORM client portal with 2FA
- Containerized backend and storefront with multi-stage Docker builds and Docker Compose

Tech: TypeScript, React, Next.js, Node.js, MedusaJS, React Native, PostgreSQL, Redis, Drizzle, MikroORM, Zod, Vitest, Jest, Playwright, Docker, Coolify, GitHub Actions

ModuloService PT Oct 2026 – Present

Freelance Web Developer (part-time side project) Remote

- Built the PT/EN/ES site of a Portuguese carpentry and renovation company, with a quote form validated by Zod, rate limited per IP and emailed through Resend
- Set up GitHub Actions CI (lint, type check, 94 Vitest tests, Docker build) and a multi-stage Docker image

Tech: Next.js, React, TypeScript, Tailwind CSS, next-intl, Zod, Resend, Vitest, Docker, GitHub Actions

Personal Projects

vagas-tech-pt – Job Aggregator | Python, FastAPI, PostgreSQL github.com/esdrassantos06/vagas-tech-pt

- Built a FastAPI and PostgreSQL API that aggregates jobs from 3 sources and deduplicates them, with resilient scrapers, 375 pytest tests and 92% coverage

liftbox – Open Source React Library | TypeScript, React, Vitest, Playwright liftbox.digital

- Published an accessible React gallery on npm: zero dependencies, 362 tests, 1,000+ downloads

Phantom Code – AI Coding Assistant | NestJS, React, Electron, LLM APIs phantomcode.pt

- Built a NestJS API that reads code from screen captures with 90%+ accuracy using the LLM each user picks, plus an Electron client and 324 Jest tests
