Summary

Full Stack Developer building web and mobile products with TypeScript, Next.js, and Node.js. Ships headless e-commerce with live payment integrations (PayPal, Multibanco, MBWay) and multilingual sites that score 90+ on Lighthouse. Owns features end to end, from Postgres schema and API to the iOS build.

Experience

JWeb

Dec 2025 – Present

Fullstack Developer

Remote

- Only developer on JWeb's production web and mobile apps, from first commit to deploy.
- Built multilingual (PT/EN/ES) institutional sites on a Keystatic CMS, scoring 90+ on Lighthouse.
- Shipped PCByte, a headless e-commerce platform: Next.js storefront, MedusaJS backend, Google OAuth, Redis caching, idempotent checkout, and PayPal, Multibanco, and MBWay payments.
- Built a companion React Native app on the same MedusaJS API, sharing auth, cart, and checkout across web and mobile.
- Designed an APNs push system (Postgres + Drizzle, admin broadcast console, Redis rate limiting) and packaged the JWeb site as a native iOS app with Capacitor.
- Covered critical flows with unit and end-to-end tests (Vitest, Playwright); enforced CSRF, rate limiting, and input validation across the API.
- Wired analytics through Google Tag Manager behind a GDPR-aware consent layer.

Featured Projects

JWeb – Institutional Website + iOS App for Digital Agency | Next.js, React, TypeScript, Drizzle ORM, PostgreSQL, APNs | jweb.pt

- Built multilingual (PT/EN/ES) institutional website with Keystatic CMS, Markdoc blog system, and 90+ Lighthouse scores.
- Implemented SEO optimization with Schema.org structured data, hreflang support, and forms validated with React Hook Form, Zod, and reCAPTCHA v3.
- Engineered a push-notification platform: PostgreSQL + Drizzle ORM device-token store, an APNs sender with batching and dead-token cleanup, an admin broadcast UI, and Redis rate limiting.
- Built a companion iOS app with Capacitor, registering APNs tokens to the backend and supporting push notifications, universal links, and App Tracking Transparency.

PCByte – Full-Stack E-Commerce Platform | Next.js, MedusaJS, React Native, PostgreSQL, Redis

pcbyte.pt

- Built a headless e-commerce platform with a Next.js storefront and a MedusaJS backend, supporting product catalog, cart, checkout, and order management.
- Developed a companion React Native mobile app consuming the same MedusaJS API, sharing auth, cart state, and checkout flows across web and mobile.
- Implemented auth (Google OAuth, email/password), Redis caching, rate limiting, idempotent flows, and payment integrations (PayPal, Multibanco, MBWay).
- Hardened the stack with CSRF protection, rate limiting, and input validation, backed by unit and end-to-end tests (Vitest, Playwright).

Phantom Code – AI-Powered Coding Assistant | Electron, React, NestJS, OpenAI API

phantomcode.pt

- Built cross-platform desktop app with OCR technology and OpenAI API integration achieving 80-90% code extraction accuracy and 60% efficiency boost.

Technical Skills

Languages: TypeScript, JavaScript, Python

Frontend: React, React Native, Next.js, Tailwind CSS

Mobile: React Native, Capacitor (iOS), APNs Push Notifications

Backend: Node.js, NestJS, Python (Flask, FastAPI)

Databases: PostgreSQL, Redis

Tools: Docker, AWS, Git
