Summary

Full Stack Engineer working in TypeScript, Node.js, and React, plus Python and FastAPI. Sole engineer on a production e-commerce platform with 70,000+ products and live payments. Works autonomously and remotely, communicates directly with management, and focuses on reliability and security.

Experience

JWeb Dec 2025 – Present
Fullstack Developer Remote

- Owned JWeb web and mobile products as sole developer, turning feature requests from management into technical designs and taking them from database design to deployment
- Shipped PCByte (pcbyte.pt), a headless e-commerce platform for real customers (Next.js, Node.js with MedusaJS, PostgreSQL, Redis) with 70,000+ products and a 92 Lighthouse performance score
- Built an idempotent checkout with PayPal and SIBS payments (card, Multibanco, MBWay), with 0 payment or duplicate-charge incidents since launch
- Wrote 3,130 tests (Vitest, Playwright) for checkout, auth, and payments, and added CSRF protection, Redis rate limiting, and Zod validation to the API
- Built backend modules for Odoo ERP sync, Meilisearch indexing, AWS S3 storage, and email
- Built a React Native app for PCByte on the same API, with its own auth, cart, and checkout flows
- Designed an APNs push service with a Postgres token store, batched sending, dead-token cleanup, Redis rate limiting, and an internal admin console
- Built a client portal on PostgreSQL and Drizzle synced with Odoo ERP, with invite-only sign-up and two-factor authentication through Better Auth

Projects

vagas-tech-pt – Job Aggregator | Python, FastAPI, PostgreSQL github.com/esdrassantos06/vagas-tech-pt

- Built a FastAPI and PostgreSQL API that aggregates tech jobs from 3 sources, normalizes salary, location, and work model, and deduplicates the same job across sources with a fingerprint
- Built resilient scrapers (Playwright, Parsel, httpx) with exponential backoff, run monitoring, and a weekly canary test that opens a GitHub issue when a site changes its HTML
- Applied TDD with 375 tests, 92% coverage, mypy strict, and 6 required CI checks, with opt-in alerts by email, Discord, and Telegram (hashed tokens, SSRF protection) and Docker deploys to Coolify

Phantom Code – AI Coding Assistant | Electron, React, NestJS, LLM APIs phantomcode.pt

- Built an Electron and NestJS app that reads code from screen captures with 90%+ accuracy, using pluggable LLM providers through the Vercel AI SDK, sold through Stripe and covered by 324 Jest tests

Folga – Tax Copilot SaaS for Portuguese Freelancers | Next.js, Drizzle, PostgreSQL folga.online

- Built a TypeScript tax engine that computes Social Security, IRS, and VAT set-asides per invoice

Skills

Languages: TypeScript, JavaScript, Python, SQL
Frameworks: Node.js, NestJS, React, Next.js, React Native, FastAPI, Tailwind CSS
Data and Testing: PostgreSQL, Redis, Drizzle, Prisma, SQLAlchemy, Vitest, Jest, Playwright, pytest
Tools: Git, GitHub Actions, Docker, AWS S3, OpenAPI, Coolify
Ways of working: Remote and async communication, written documentation, ownership, problem solving
Spoken languages: Portuguese (native), English

Education

Tokio School | Front-end Developer Jan 2025
