Summary

Full Stack Developer focused on building scalable web applications with TypeScript, Next.js, and Node.js. Experience delivering production-ready features, improving performance (90+ Lighthouse scores), and developing real-world solutions including e-commerce systems with payment integrations and multilingual platforms. Strong focus on clean architecture, performance optimization, and user experience.

Experience

JWeb

Dec 2025 – Present

Fullstack Developer

Remote

- Sole developer responsible for building and maintaining production web and mobile applications.
- Built institutional websites with CMS-driven multilingual content, achieving 90+ Lighthouse performance scores.
- Developed a full-stack e-commerce platform (PCByte) with a Next.js storefront and MedusaJS backend, featuring Google OAuth, Redis caching, rate limiting, idempotent API flows, and payment integrations (PayPal, Multibanco, MBWay).
- Built a companion React Native mobile app consuming the same MedusaJS API, sharing auth, cart state, and checkout flows across web and mobile.
- Implemented security best practices, unit tests, and end-to-end tests with Playwright.
- Implemented analytics tracking with Google Tag Manager and a GDPR-aware consent architecture.

Featured Projects

JWeb – Institutional Website for Digital Agency | Next.js, React, TypeScript, Tailwind CSS

jweb.pt

- Built multilingual (PT/EN/ES) institutional website with Keystatic CMS, Markdoc blog system, and 90+ Lighthouse scores.
- Implemented SEO optimization with Schema.org structured data, hreflang support, and validated forms with React Hook Form and Zod.

PCByte – Full-Stack E-Commerce Platform | Next.js, MedusaJS, React Native, PostgreSQL, Redis

pcbyte.pt

- Built a headless e-commerce platform with a Next.js storefront and a MedusaJS backend, supporting product catalog, cart, checkout, and order management.
- Developed a companion React Native mobile app consuming the same MedusaJS API, sharing auth, cart state, and checkout flows across web and mobile.
- Implemented auth (Google OAuth, email/password), Redis caching, rate limiting, idempotent flows, and payment integrations (PayPal, Multibanco, MBWay).
- Enforced security best practices throughout the stack, with unit tests and end-to-end coverage via Playwright.

Phantom Code – AI-Powered Coding Assistant | Electron, React, NestJS, OpenAI API

phantomcode.pt

- Built cross-platform desktop app with OCR technology and OpenAI API integration achieving 80-90% code extraction accuracy and 60% efficiency boost.

Education

IEFP

Nov 2025 – Present

Technical Specialist in Information Systems Technologies and Programming

Remote

- Comprehensive program covering software development, system programming, and information systems management.

Technical Skills

Languages: TypeScript, JavaScript, Python

Frontend: React, React Native, Next.js, Tailwind CSS

Backend: Node.js, NestJS, Python (Flask, FastAPI)

Databases: PostgreSQL, Redis

Tools: Docker, AWS, Git
